World's First Galvanic Isolators for 4K Medical Video

Bringing Safety to High-Resolution Video

Patented
USA: US 11,585,522 B2 / Japan: P6575701 / China: ZL202008069500.7

We offer the first high-speed galvanic isolators for 4K/8K video. Our patented isolators with built-in semiconductor lasers enable breakthrough USB 3.x and HDMI 2.0 performance. A 12G-SDI version is also in development for medical use, where high-resolution video isolation is increasingly needed.

- Temperature sensors
- Microsensors

UaMAT Sensor

UaMAT sensor uses thin-film thermistors and our original control system to measure thermal conductivity with ultra-high speed and precision by detecting minute temperature changes. This method is expected to be applied to non-invasive skin cancer diagnostic devices without removing affected area.

When it comes to the Japanese medical and healthcare market, there are few companies who have the same experience and insight that Messe Düsseldorf has. For the past 31 years, Messe Düsseldorf Group has been operating in Japan via its subsidiary Messe Düsseldorf Japan, Ltd., bringing Japanese exhibitors and visitors to the MEDICA & COMPAMED in Düsseldorf and our medical trade shows worldwide which is under the brand name MEDICAlliance. During this time, we have built close relations with all major Japanese medical associations and other industry groups, and we have been continually monitoring the domestic medical and health-related devices market. Naturally, we follow international trends as well. Through our presence at the leading Japanese medical trade fairs, we exchange opinions with industry leaders and players, many of whom are repeat exhibitors at Messe Düsseldorf trade shows.
